THESIS COMMITTEE REPORT – 2nd year

Student's name

Alexandre Afonso

PhD start date: ____/____/____ Current date: ____/____/____

	Yes	No
1 – Does the student show up-to-date scientific knowledge on the area he/she is working (eg. paper reading)?	X	
2 – Is the research project running according to the initial proposal?	X	
3 – Are the techniques used adequate to answer the scientific questions?	X	
4 – Does the student show a good time management?	X	
5 – Are the future plans realistic and pertinent?		X
6 – Does the student show good presentation and communications skills?	X	
7 – Does the student discuss and or present his/her work regularly (eg. Meetings with supervisor; lab meetings)	X	
8 – Do you recommend any specific training for the student?		X
9 – Do you recommend an extra meeting with the student (*Besides the ordinary meeting scheduled for the end of the 3rd year*)?		X
10 – Does the student have an adequate paper publication strategy (paper publication preferably within the first three years of the PhD)?		X

Main conclusions:

- The simulator is worthy of pursuing to check if the null-hypothesis is true
- If it is, that's a noteworthy result in itself as it disproves an assumption of the field
    - Then the focus should be on firming up this result, proving that the simulator is working as intended and is not adding unintentional bias
- If the null-hypothesis is not true
    - Continue as planned
- Bench work is seen as risk due to the time frame involved

Thesis Committee

Sérgio [illegible]	[illegible]	Sérgio Dias

☐ I confirm my presence in this meeting and had knowledge of the results and assessment of the Thesis Committee

____
Supervisor

V I didn't attend the meeting but had knowledge of the results and assessment of the Thesis Committee

Nuno Luís Barbosa Morais

Supervisor

This information is restricted for the student, supervisor and thesis committee
